ABOUT

Computer Science student at Mackenzie Presbyterian University with a technical degree in Systems Development from ETEC. Tech Intern at Amazon on the Enablement Platform Engineering & Generative AI Solutions team within AWS Partner Core. Hands-on experience building React and TypeScript web applications with API integration.

EXPERIENCE

Tech Intern — Amazon, AWS Partner Core Sep 2026 – Present

- Build scalable technical solutions across generative AI, analytics, and workflow automation on the Enablement Platform Engineering & Generative AI Solutions (ESS) team.
- Contribute to Bedrock applications, QuickSight data pipelines, and content-management UIs.

Full Stack Developer — toLearn Mar 2026 – Aug 2026

- Developed and shipped 25+ features to production using React, TypeScript, and Node.js.
- Reduced render time of critical components with React.memo and useMemo, improving application performance.
- Implemented personalized learning paths powered by adaptive AI.
- Integrated REST APIs and collaborated via Git, pull requests, and code review.

SKILLS

ADVANCED: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Git and GitHub

INTERMEDIATE: Python, Claude Code

LANGUAGES: Portuguese (native), English (fluent)

EDUCATION

B.Sc. in Computer Science — Mackenzie Presbyterian University 2026 – 2029

Technical Degree in Systems Development — ETEC Praia Grande 2023 – 2025

English as a Second Language — CNA Idiomas 2022 – 2026

PROJECTS

FitMeta React · TypeScript · Supabase · React Query

Developed a workout-management web app with authentication, database-backed CRUD, protected routes, and global state management. Component-based architecture focused on scalability and best practices.

github.com/guilhermerezende10/FitMeta · fitmeta.com.br

Docgen React · TypeScript · Ollama · Vite

Created a web app that takes source code in 10+ languages, auto-detects the language, and generates structured technical documentation with a local LLM — no cloud or API key required.
